

# REVE Evaluation Questionnaire

## Project evaluation on basis of inputs from the project partners

Please provide to each question a concise (1-2 short paragraphs, or maybe more detailed, if you wish) textual answer with your opinion and send it to [mazar@eden-online.org](mailto:mazar@eden-online.org), so that we can summarise them for the project report.

### ***Development of the environment***

- Which important changes would you identify in the European e-learning environment as having emerged since the beginning of the project?
- How do you think these developments influence the project's aims - how did the relevance of the project goals change during the implementation period?

### ***Interactions – Innovations***

- What kind of formal or informal feedback (relevant to the project) did you experience during the project implementation from actors in the field (users, governments and policy makers)
- Which new aspects, approaches, tasks, ideas do you think have emerged during the project realisation – in comparison with the initially used ones?
- On basis of your experience, what kind of interrelations, synergies could be observed with other similar initiatives during the project implementation?

### ***Achievements***

- *External communication* – How efficient is in your opinion the “communication interface” of the project towards the targeted partners and users?
  - project web site
  - organisation of and participation at seminars
- How would you personally assess the information and experience gathered with the implementation of Work Packages?

- How do you appraise the match between the expected results, the invested resources, and the goals achieved
- What is your impression concerning how the Commission has considered the project and how did they rely on its outcomes?

### ***Internal implementation – Project management***

- How would you assess the involvement and co-operation of partners within the project consortium?
- Have the partners' complementary competencies been used in an efficient way?
- What do you think about the tasks realised and resources available – were they appropriately proportional?
- How would you evaluate the work done by the project co-ordination and central management?
- What is your opinion about the monitoring the scheduling of activities? Were the various deadlines well respected?
- What do you think about the efficiency of the *internal communication* (meetings, partners' mailing list)

### ***A look forward – Dissemination and Sustainability actions***

- In general, which strong and which weak sides of the project would you mention alongside the execution
- What kind of future actions would you find relevant in the context of the project?
- What would you propose concerning potential continuation/extension of REVE?
